Description

OVERVIEW

LT Series trailers are designed to fit most one seat watercraft models.

FEATURES

- Fully Welded Frame: The Triton difference -- all-aluminum, fully welded frame provides a solid structure for years of loading and unloading.
- Custom extrusions and robust 2" x 3" frame with scallop design provides added strength.
- 1000# swivel wheel tongue jack with 10" up/down travel helps you easily move the trailer into position. Rear ratchet straps secure machines and retract when not in use. (2 straps per machine). Designed To Fit All Watercraft Models:
- Adjustable 6' bunks and Infinite Slide Adjust (ISA) bow stop allow for proper fit of any personal watercraft, from one-seat to three-seat models.
- Adjustable Bunks: 6' bunks can slide from left to right to properly accommodate the craft hull. Bunks can also be angled to perfectly cradle the craft.
- Tie Downs: Welded aluminum tie downs provide multiple points to secure crafts. LTWCI models have 6 tie downs.
- Spring Axle: LT Series models are standard with single spring axle.
- Sealed LED Lights: Sealed lights and wiring harnesses throughout trailer resist corrosion caused by moisture.
- Keel Guard: Non-marring, UV-resistant keel guard is positioned at a potential impact area to shield the craft. Product specifications are subject to change without notice.
